Authentifizierung bei Microservices OAuth und OpenID

Praktikum Software-Architektur | SS 17

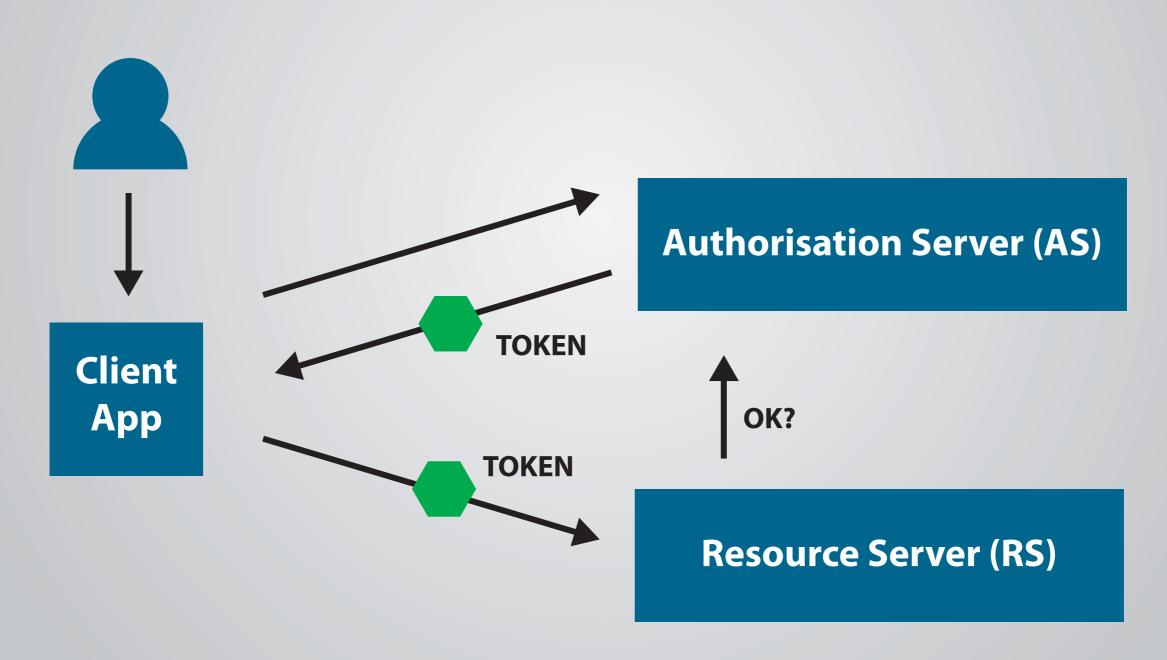

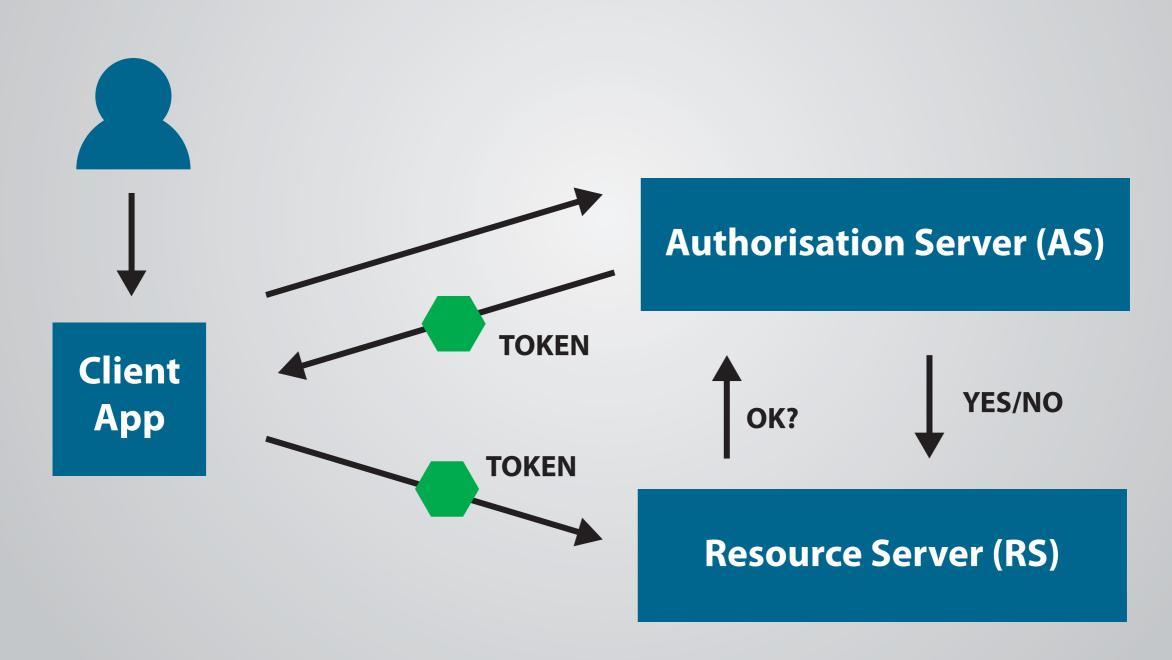

Authorisation Server (AS)

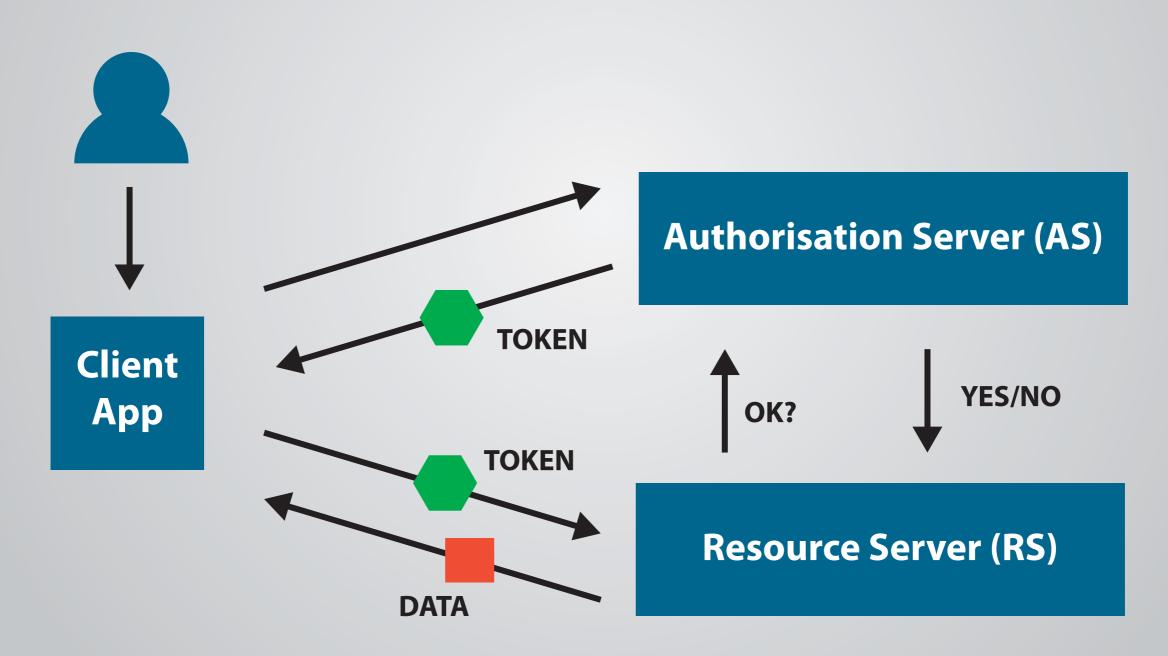

Resource Server (RS)

Resource Server (RS)

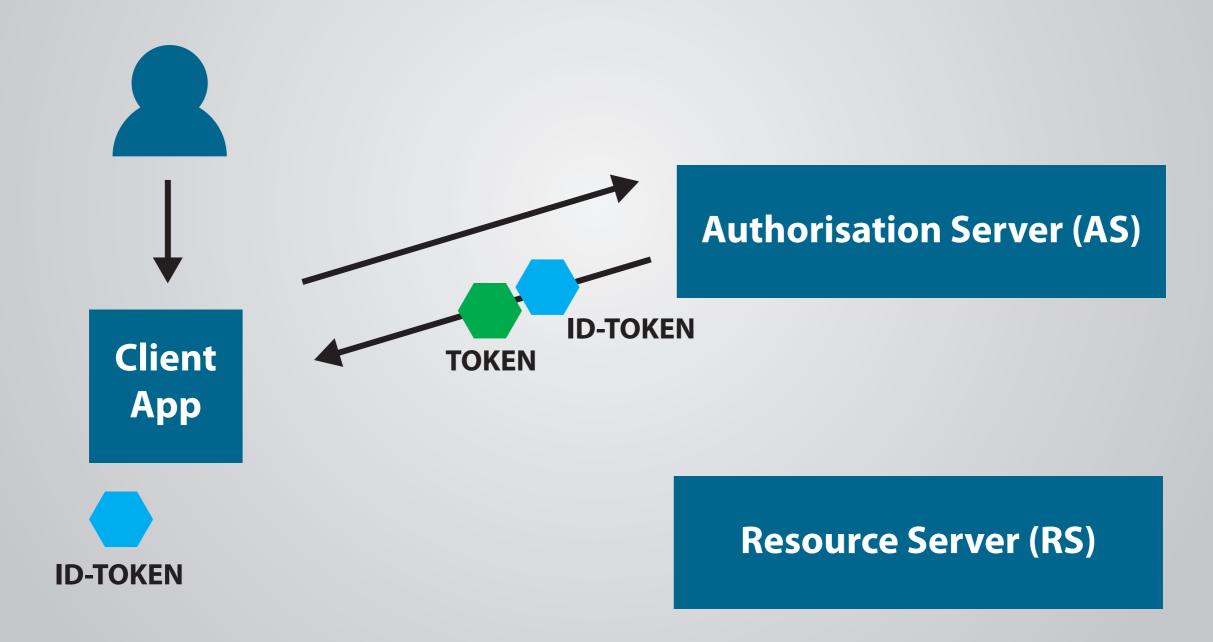

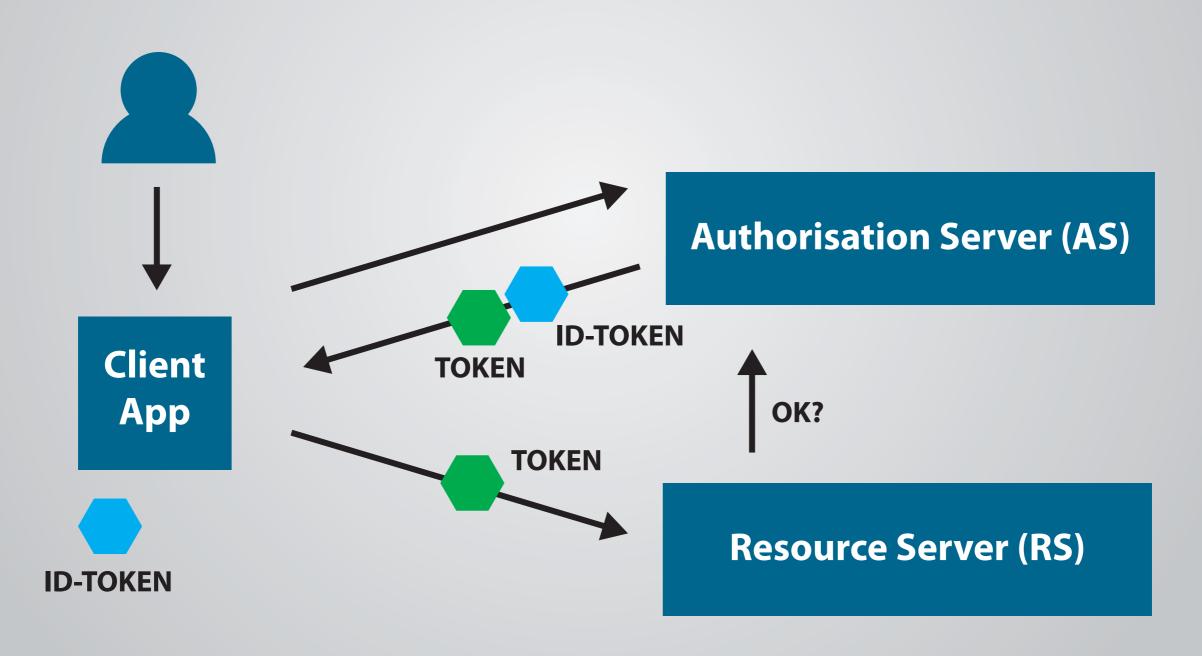

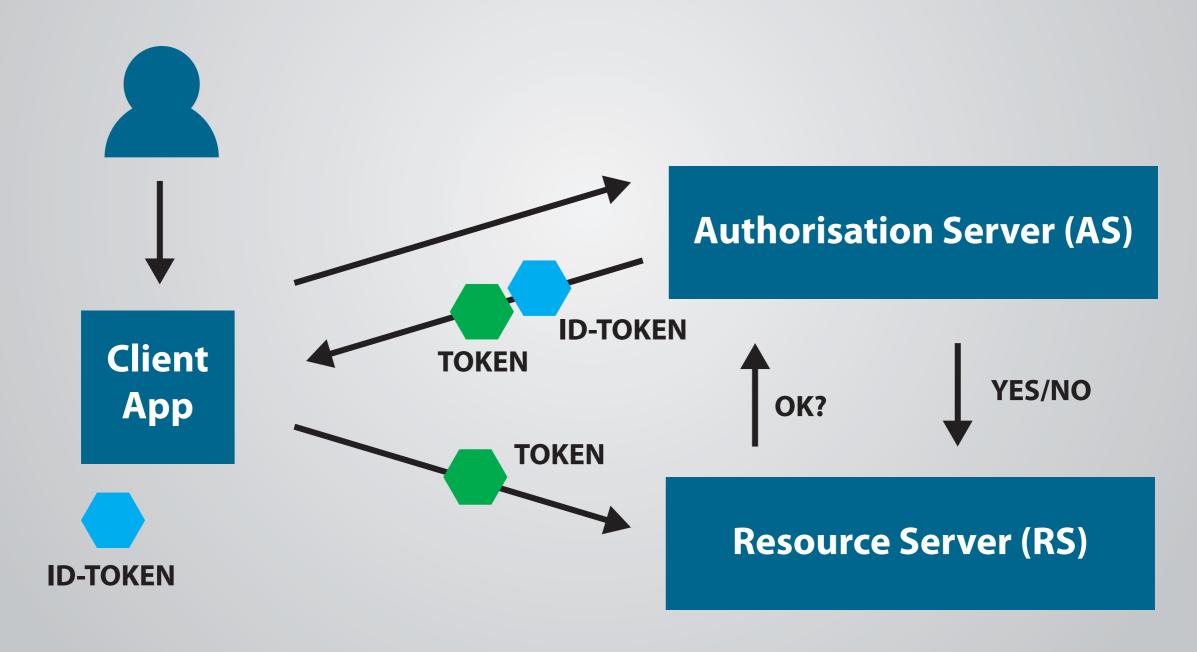

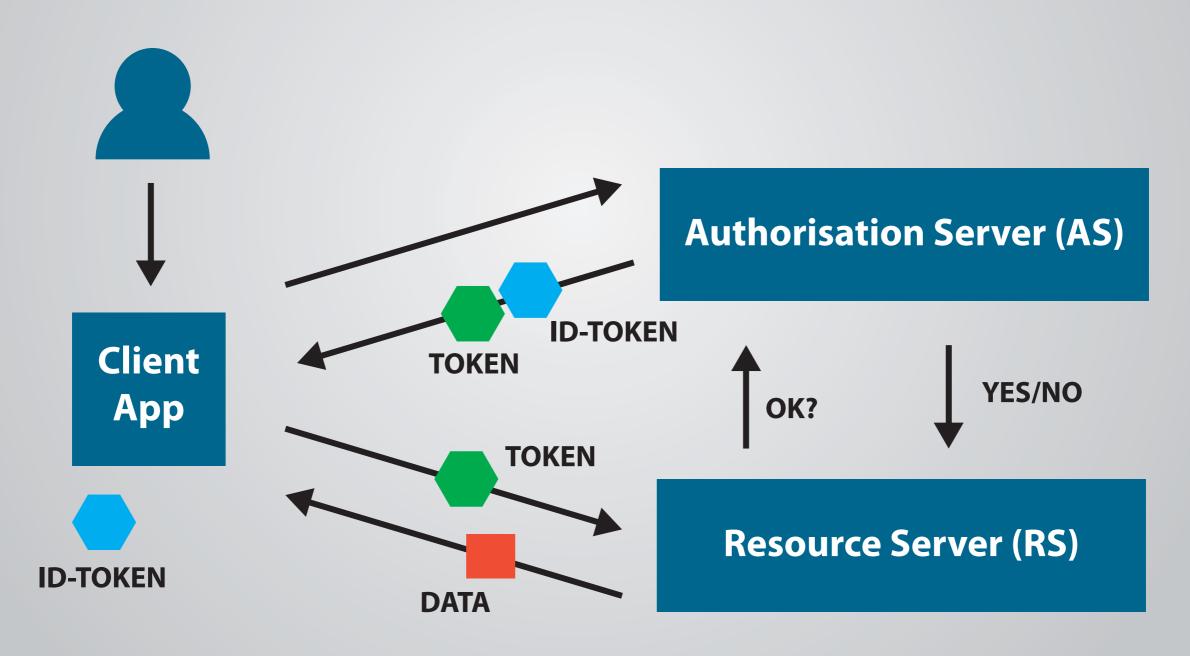

Authorisation Server (AS)

Resource Server (RS)

Präferierte Alternative

Verwendung von OAuth bei Sharelt:

- OpenID nicht notwendig
- unabhängige Registrierung
- Admin verifiziert neue Accounts
- weniger zeit- und kostenintensiv

Praktikumsaufgabe

- minimaler Authorisation Server
- 2 Nutzergruppen:
 - User
 - Admin
- Funktionen:
 - Authentifizierung
 - keine Registrierung
